PROJECTS (Major)

- **Wurkn |** ReactJs, TypeScript, TailwindCSS, Docker, Redis, Python, Django, OpenAI ***Live***
  - An employee feedback and sentiment analysis platform where companies collect feedback from employees; employees can submit feedback anonymously so they can share openly.
  - Companies see all feedback as sentiment trends, cultural insights, and department-level analytics on dashboards, so they can act on feedback without identifying who said what.

- **LookoutAi |** NextJS, TypeScript, TailwindCSS, Redux Toolkit, Framer Motion, Firebase ***Live***
  - **AI-Driven Talent Acquisition:** Developed an intelligent recruitment platform that automates candidate screening and optimizes the evaluation process through AI-powered assessment modules.
  - **Streamlined Recruitment Lifecycle:** Built advanced candidate discovery tools and integrated real-time collaboration features to simplify large-scale hiring workflows and improve talent matching accuracy.

- **Shiplo & Heale |** NextJS, Tanstack, Zustand, TailwindCSS, NestJS, MongoDB, Redis, Shipengine, Stripe ***Live***
  - Developed a **comprehensive shipment and transport management system** enabling users to manage inventory, create shipment labels, and generate real-time shipping quotes.
  - Integrated **ShipEngine API** for automated label creation and shipment rate calculation.

- **Aignite |** Developed an AI-powered mock interview platform where users can practice interviews with real-time feedback. ***Live***
